August 2026–District Technology Update

The Chromebooks, cases, and chargers are all numbered, providing a better system for tracking district equipment and preventing students from stealing from one another. They have also been power-washed and internally cleaned and are ready to be distributed when the time comes. I am still working on creating a list of the students who need to be billed for missing equipment.

I am still missing teacher laptops, but in the meantime, I am working on updating and performing maintenance on the ones I have.

Bonita and I are working to implement PowerSchool's SPED program. We are working on importing our most current students and working back from there.

Created QR code badges for our younger students so that we can eliminate the need for Driftwood to have the same password for each student. It will need to be tested again after registration to ensure everything works correctly.

Working on cleaning up users who are no longer with us on our server, as well as in Google.

Working on adding to our asset list, along with surplus technology we no longer need/support.

New Projects

Clever Badges

Teacher Laptop Update

Ongoing Projects

Verkada Cameras and vape sensor installation

Power School SPED Implementation

Chromebook Update

Cleaning up the Server Room

Inventory - Deprovisioning Chromebooks & Rotating in new Chromebooks

Documentation

InTouch (Credit Card Readers)

Microsoft 365 implementation
