Superintendent

ACTION

**BACKGROUND INFORMATION**

Several years ago, high profile light pole failures prompted municipalities and school districts to evaluate the condition of their light poles, towers, etc. CCCCSD determined that our poles were not manufactured by any of the “high-failure\_ firms in question, bt we never performed detailed inspections by engineers on our poles.

Such firms continue to approach schools about inspections. As Maintenance Director John Kain and I are both relatively new to CCCCSD, we request Board preference or inclination on this matter. Mr. Kain will present current estimates and scope of work for your awareness and consideration.

**ADMINISTRATIVE RECOMMENDATION**

No specific recommendation. Board direction sought.

**APPROVAL/DISAPPROVAL**
