June 2018

E-Rate

Our e-rate for our category 2 services was approved in the 12th wave of e-rate funding last week. The moneys awarded will reimburse our network partner at 85% for the maintenance/warranty work when needed on our switches and wireless network. Total awarded dollars are \$5800.

Summer Work

We are now in our summer mode working around custodians and other staff to repair chromebooks, mount/remount some projectors where needed, etc. We will also take advantage of the downtime to perform firmware updates on our core technologies including network switches, wireless networks, firewall, web filter and servers.

Our other summer items are transitioning equipment from our staff that left us and make it ready for the next users arriving in August.

Browning Tech Day -coming August 23rd at the high school. We will have the team of Jeff Crews and Dean Phillips from Beyond the Chalk in Missoula and Nancy Magnum, a national inspiring trainer based our of North Carolina. We are looking forward to a day of tech infusion showing teachers how to further enhance their instruction with various technology tools during this day.
