

Where Little Learners Expect Great Things!

Summer Learning and Fun!

Summer School Learning has sure been exciting and fun! Pictured above is an observational sheet our 2nd graders (Super Scientists) used to record what happened to their Gummy Bears when left in Water or in Vinegar overnight!

Hopefully not too many experiments begin happening in kitchen's at home now, but it is neat to see the kids learning terms such as absorption, rate, and different ways of measuring how things react to other materials! Thank you Ms. Blomberg!

Thank you Food Service!

We also want to extend a Giant Thank You! To Mrs. Becky Frisby and the whole crew in our food service department. They've kept our communities children fed with free Breakfast and lunch all summer long. The smiles on the kids' faces when they get the special meals prepared sure makes it worth it! Thank you!

Gearing Up For School...

- Class Lists
- Infinite Campus Scheduling
- 4K/K conferences
- 1st Days of School
- Inservices and Trainings
- Collaborative Time
- Raising Achievement...Walk to Read, Data and EE / AGR Goals, etc
- Title 1 Transfer
- Onboarding 2 FT RDG Corps
- New Teachers
- ACT 20 !
