Hello,

We received one Cash for Class grant application from the Boyceville Community School District this year. After completing the application review and final award process, that applicant was selected to receive a \$500 grant.

The Boyceville award recipient is:

Split funding—\$250 direct agency funding and \$250 State Farm Foundation matching funds:

- Kysa Deitz — \$500
The TouchChat augmentative and alternative communication application for an iPad to provide speech-generating communication access for young children with complex communication needs.

Kysa's \$500 award is being funded equally through direct agency funding and State Farm Foundation matching funds.

We are preparing the grant check and recipient communication. Thank you for helping us share this opportunity with Boyceville educators and for supporting their efforts to provide meaningful classroom experiences for students.

Sincerely,

Jackie Hunt & Our State Farm Team
