

**Quarterly Investment Report
Ending February 28, 2019**

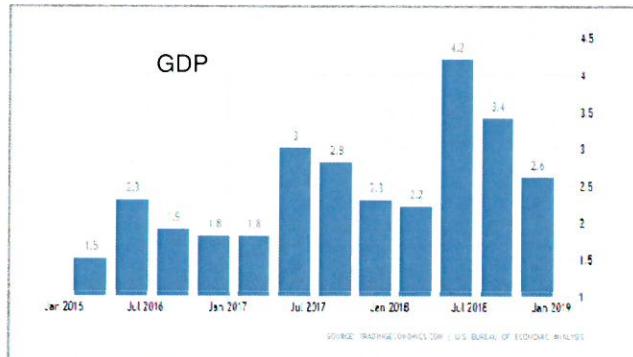

Patience is a Virtue

The Federal Reserve seems to have done a 180 from December but the new message is clear: they are waiting to see the data. Chairman Powell is intent on reiterating patience on the still strong economy. In testimony this month he stated *"When I say that we are going to be patient what that really means is that we are in no rush to make a judgment about changes in policy. We are going to be patient. We are going to allow the situation to evolve ... and allow the data to come in. And I think we are in a very good place to do that."* For most Fed officials, international concerns and the future risk of contagion from a growth and disinflation standpoint remain a deterrent. As a result the market does not anticipate a hike in March and a Bloomberg survey reported a 90% chance of no hikes in 2019. But the strength has moderated the talk of easing in 2019 also.

The U.S. economy ended 2018 on a stronger note than anticipated. GDP was a welcome surprise to the upside with the initial 4Q read at 2.6%, well above the 2.2% forecast. However, the details have some analysts scratching their heads. After all, December retail sales fell a whopping 1.2%, yet the consumer appears to be on relatively solid footing. A declining trend was apparent at year end but the outsized drop in December was no doubt exacerbated by the anticipation of and the actual government shutdown.

The seeming conflict in data this quarter continues. Employment is strong but construction is down. Business investment (a willingness to invest) is stronger but residential investments are weaker. CPI remains unchanged at the Fed's target with energy savings offsetting other food /core costs. Some of the data mismatches will be reconciled in the coming months but for now the Fed can justify the stronger-than-expected growth rate at the end of last year as reinforcement to the Committee's notion of continued steady growth and the expectation of solid growth although at a slower pace.

Trade and Brexit

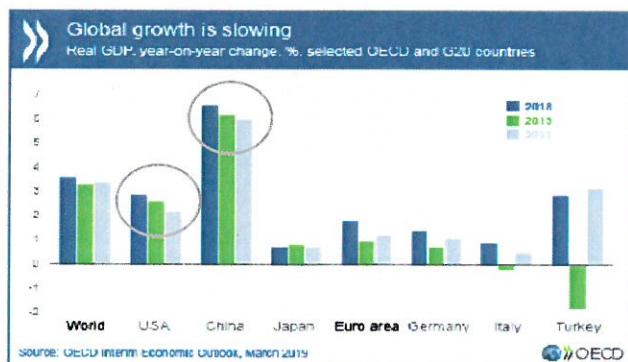

According to the WSJ and *undisclosed sources* the US and China are close to a trade deal. China would be increasing its purchases of agricultural products, autos and chemicals and the US would be lessening or removing the sanctions imposed over the last year. Even a partial resolution would settle markets which are taking a wait and see stance. A March 27th deadline is anticipated.

The trade issue is critical to both countries. China has been spending billions in stimulus measures to shore up its economy and reduce the risk of a continuing slowdown which began last year. There is an increasing use of tax policy to maintain growth. The Premier understated official statement summed it up as a "tough struggle in a complicated environment."

Italy is ready to become the first G7 country to join China's Belt and Road Initiative which is another arm of China's growth agenda. This Italian move has a second benefit to China, it undermines the US pressure on China in the trade m=negotiations.

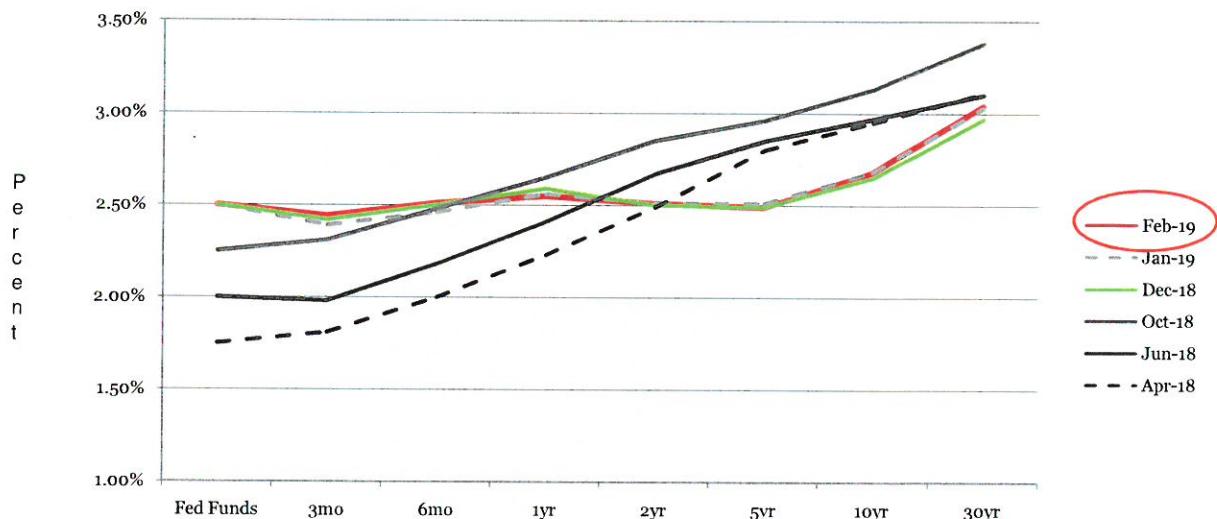

An equally important event is the Brexit deal which has a hard deadline of March 29th. Hung up on an *Irish Backstop* provision, the Brexit deal has an even greater potential impact on the European region. A 'soft" exit appears farther and farther away. PM May has even offered £1.6B to aide poorer areas in anticipation of the non-deal but critics describe it as *buying votes*. While trade sanctions and levels will settle into international dealings relatively quickly a Brexit – especially one not fully clarified – will have long-term trade and financial ramifications.

The deadline dates for both these events is eerily close to the ides of March which to the ancient Romans was a deadline for settling debts.

The Flattening Curve

- Two inversions continue on the curve. An inversion around the 3 month area can be explained by investors keeping their powder dry in these turbulent markets. The flat to inverted 1 year to 5 year area is more troubling. But with the US curve continuing to outperform all other major markets the situation is clearly not a result of weakness in the economy. It has not been and continues to be not a panic situation.
- The key to interpreting the yield curve continues to come from the general slowing of the global economy and the anticipation that without inflation or stronger growth the Fed will not be able to continue raising rates. If the Fed does not raise rates money will be cheap and stock markets will continue to run.

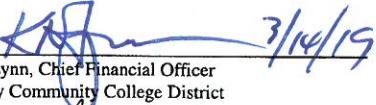

End of Month Rates - Full Yield Curve – Fed Funds to 30yr

 3/13/19
Julie Bradley, Associate V.P.
Collin County Community College District

Linda T. Patterson, President
Patterson & Associates as Investment Advisor, CCCCD

 3/13/19
Barbara Johnston, Associate V.P.
Collin County Community College District

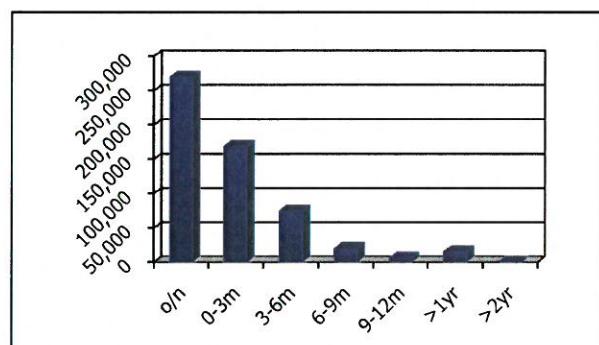

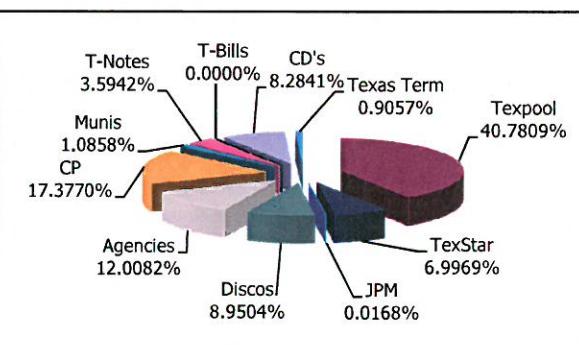

¹ WAM – weighted average maturity

² "Change in Market Value" is required data, but will primarily reflect the receipt and expenditure of the District's funds from quarter to quarter.
Patterson & Associates has assisted in the preparation of this consolidated investment report, with additional input provided by CCCCD.

Your Portfolio

As of February 28, 2019

- P&A constantly reviews your portfolio for optimal asset allocation and a controlled average maturity because a diversified portfolio can better adjust to volatile market conditions.
- The graphs below show asset allocations by market sector and by maturity. They do reflect our anticipation of a rate increase in 2019 – and possibly two –but not in the first quarter. This slowdown in rate hikes and the potential of decreasing rates indicates the need to extend portfolios. Extending now will lock in yields even though rates may decrease and provides for extra safety.
- The non-cash portion of your portfolio is yielding 2.60%.
