WHAT IS EAV?

Equalized Assessed Valuation

- EAV is the property valuation after the county and state equalization calculations are performed

Why is EAV Important?

- Any growth in EAV must be captured to ensure the financial health of the District. The total EAV is multiplied by the approved tax rate (per \$100 EAV) to arrive at the extension

PROPERTY TAX EXTENSION LIMITATION LAW – PTELL

- The Property Tax Extension Limitation Law (PTELL) became effective in 1991
 - PTELL is designed to limit the increases in property tax extensions (total taxes billed) for taxing districts
 - Commonly called the “Tax Cap” the use of this phrase can be misleading. PTELL does not cap an individual’s property tax bill or property assessment
 - PTELL allows a taxing district to receive a limited inflationary increase in tax extensions on property

WHAT IS THE LIMITATION?

- Increases in property tax extension for the existing property are limited to the lesser of 5 percent or the increase in the Consumer Price Index for Urban (CPI-U) for the year preceding the levy year
- This limitation does not apply to new property (construction), which allows taxing bodies to recoup their “fair share” of tax revenue for that property
- There has been limited CPI-U of 5 percent since the inception of PTELL

CALCULATING THE LIMITING RATE

The limiting rate is the calculated total allowable tax rate. This rate is used to calculate the total tax extension:

$$\text{Limiting Rate} = \frac{\text{Prior Year Extension} \times (1 + \text{Lessor of } 5\% \text{ or CPI-U})}{\text{Total EAV} - \text{New Property (construction)}}$$

Notes:

- The Limiting Rate is based on the prior year extension
- New Property (construction) is outside the tax cap
- Debt Service payments are outside the tax cap
