

SOLE SOURCE STATEMENT

April 25, 2025

To whom it may concern:

I am an authorized representative of Panorama Education, Inc., and I am writing to affirm that Panorama is the sole source supplier of our Student Success platform for school improvement and interventions. proprietary platform for presenting trends across attendance, academic, and behavior indicators, managing MTSS and interventions to improve student outcomes.

Introduction

Panorama's unique product includes a data dashboard that shows key indicators of student success every day, and an intervention and progress monitoring system that ensures effective student supports are carried out with fidelity. Panorama's services include implementation support, customer service, and professional development for teachers, school leaders, and district leaders.

Panorama currently supports fifteen million students annually across more than 1,500 school districts nationwide, and we proudly serve as a thought partner and leading provider in student data dashboards for MTSS, school climate, and college and career readiness. Panorama is the sole provider for such programs for three reasons:

1. Central to Chanute Public's vision for this program is the opportunity to combine academic, attendance, behavior, data into one platform alongside intervention management tools, and custom reporting needs for teachers and administrators. Panorama is the only provider able to offer one such integrated Student Success dashboard for school improvement and interventions. (While Chanute Public could meet some of their needs by selecting a patchwork of vendors, such an approach would leave many of their key needs unmet, and a patchwork of projects, rather than a unified initiative, would lessen the impact of this program on student outcomes.)
2. Implementing effective student interventions with fidelity is a critical component of supporting progress toward on-track graduation. Panorama's proprietary student success platform is the only solution that empowers educators to create, assign, and monitor the progress of tiered interventions and supports, and understand the overall effectiveness of interventions in the context of other key performance indicators.]
3. No other vendors provide the same level of comprehensive reporting as Panorama's proprietary student success platform, which provides unique insights around student achievement and equity. Within the platform, educators can aggregate and disaggregate

data at the district, school, and student levels, as well as filter data by student demographics, which helps educators create and maintain equitable learning environments. Additionally, Panorama's customizable reporting capabilities provide Chanute Public with the information needed to track progress toward strategic goals and priorities at the district level.

Essential Functionality that is Unique to Panorama

The following criteria are essential to a successful student success dashboard/MTSS platform/intervention tracking tool as envisioned by Chanute Public, and Panorama is the sole source provider of a product that meets all of these needs.

Data Integration

- Ability to integrate academic, attendance, and behavioral data into one dashboard
- Ability to integrate nightly with Powerschool and other critical data systems, such as the Kansas State Assessment, ACT, NWEA MAP, Fastbridge.
- Ability to provide an expert client success team that works closely with district data teams to create an efficient and customized data plan for seamless integration and has deep experience implementing similar programs with Kansas school districts.

Data Analysis and Reporting

- Ability for educators and leaders to view attendance, behavior, and academic (both coursework and assessment) data side-by-side
- Ability to aggregate and disaggregate data at the district, school, and student levels
- Ability to organize students into groups and monitor their growth across four key indicators: on track for college/career readiness, on track for graduation, at risk, and critical
- Ability to analyze data by meaningful groups including demographics, FRPL, ELL, SPED, attendance, and academics
- Ability to group students by demographic information to understand trends and patterns
- Ability to view change-over-time data to understand student progress
- Ability to configure secure role-based permissioning to ensure that each authorized Chanute Public user is able to access their data and only the data to which they are authorized
- Ability to track district average-daily-attendance within an interactive graph
- Ability to view student-level attendance that considers full-day, half-day, and class-by-class absences via a calendar view
- Ability to changes in student progress across a given campus via trending indicators for students' academics, behavior, and attendance

Interventions and Progress Monitoring

- Ability to create intervention plans for individual students or groups of students
- Ability to assign “champions,” or individual educators responsible for implementation, to intervention plans
- Ability to view progress monitoring data for each intervention, which includes an aim line for the trajectory of how each student should be progressing to meet the stated goal
- Ability to view a summary of intervention status across an entire school to determine intervention effectiveness
- Ability to create a customized intervention library for Chanute Public educators to find intervention strategies that best support students

Using Panorama’s Student Success platform and combining our intervention and progress monitoring toolset with academic, attendance, and behavior data, Chanute Public educators will have a rich and centralized data source for identifying at-risk students, understanding patterns and trends, implementing tiered interventions and support, and progress monitoring to ensure the success of each and every Chanute Public student. This integrated, customizable approach to understanding overall student progress and growth makes Panorama, to the best of our market knowledge, the only product of its kind for analyzing data across academics, attendance, behavior, and other sources, to support teachers and school leaders as they take action towards key district priorities.

Please let us know if you have any questions.

Sincerely,

Michael Reynolds
