

NFMS GRADING & REPORTING 2023-2024

A Summary of Grading Changes

Previous System	Revised System
Each subject had standards separated out and graded in the grade book. (Mastery based grading)	Assignments as a whole are graded.
0-4 Numeric Scale >> Converted to Letter Grades	A student's grade is a percentage based on the points possible.
Habits of Mind Grades for Each Subject	Comments for each subject to add context to each student's grade.

Grades Are Now Based on **Total Points**

- Teachers assign a point value to each task and assessment. For example, a unit test might be worth 100 points, while a project might be worth 30 points.
- The students' cumulative grade is based on the total points earned, divided by the total points attempted within each assignment type.
- A cumulative grade is calculated for each assignment category, which are then averaged together based on each type's weights.

All grades fall into one of two categories:

ASSESSMENTS

60%

- Assessments are worth 60% of the total grade.
- Assessments measure achievement. They are designed to allow students to demonstrate mastery of content that was explicitly taught over a set period of time.

TASKS

40%

- Tasks are worth 40% of the total grade.
- Tasks represent the day to day learning.
