

College Affordability and Transparency List

Which colleges have the highest and lowest tuition and net prices?

Use the options below to generate a report on the highest (top 5%) and lowest (bottom 10%) academic year charges for each sector. Tuition reports include tuition and required fees. Net price is cost of attendance minus grant and scholarship aid. Data are reported by institutions and are for full-time beginning students.

(1) Net Price after Scholarships and Grant Aid, 2021-22

(2) in-state/in-district students

(3) Percent of full-time beginning undergraduate students who received grant or scholarship aid from federal, state or local governments, or the institution.

Note: Average net price is generated by subtracting the average amount of federal, state/local government, or institutional grant or scholarship aid from the total cost of attendance. Total cost of attendance is the sum of published tuition and required fees (lower of in-district or in-state, where applicable), books and supplies, and the weighted average for room and board and other expenses.

Average net price is for full-time beginning undergraduate students who received grant or scholarship aid from federal, state or local governments, or the institution.
