Good afternoon,

We will be there for the presentation next Wednesday, Oct. 25th at 5pm.

We will need PowerPoint capability for the presentation. I talked to Corina and she said this will not be a problem and I will show up early to upload the PowerPoint.

The presentation will describe results from a study we conducted last spring in 6th - 8th grade children where we collected physical activity, sleep, screen time, and body composition. In addition, we also conducted focus groups and have themes to present that were identified from the responses participant's gave to our questions. The conclusions will guide the next steps that I will be proposing and will be seeking support from the superintendent and school board. Thanks.
