# Feedback

“Your conference is extremely professional and well-run. It doesn't feel like something run by a school district.”

“As a whole, it was the best yet! I have attended everyone of them. Love the Food Trucks, the vendors, and especially the presenters. Being able to see what was offered and set our schedules via our mobile devices was awesome.”

“Each session I attended was brilliant. ALL helpful/useful. Thank you for increased Librarian offerings.”

“Denton does an amazing job of organizing TIA. Thanks for opening it up to other districts! TIA works! It's a wonderful combination of superb keynote speakers, fantastic presenters, exhibitors and collaboration opportunities.” \*\*\*

# Feedback (Delta)

“I would like to see more teachers speak on things in there classroom with and without technology. I know it's TIA, but it would be awesome to incorporate some sessions that are not about technology....like classroom management, games in the classroom with technology and with out technology...things like that maybe. But I know this is a technology week :))”

Communication:

“Maps would be nice. Seems like the last two years I've had to find my way around, and I know I missed some stuff because I was not aware of locations.”

“I wish there was a way to check the attendance of some of the breakout sessions, so that enough seating could be provided. There were several that I attended that were standing room only. Also, there was two presenters whom I feel could be keynote speakers. One was a gentleman who spoke about real news and websites and fake news and websites that was so eye-opening.”
