

LJSD Board of Trustees
Transportation Report - February 18, 2026

Transportation Updates:

- We continue to experience a shortage of drivers and are actively working to support our trainees through the certification process. However, due to seasonal illness impacting staffing levels and requiring all available personnel to cover routes (including CDL-holding office staff), training progress has been temporarily limited. Despite these challenges, we are making steady progress and look forward to our two trainees being ready to test for their CDL in the near future.
- As we enter our busiest season, we are optimistic about moving beyond the winter months and improving overall operations.
- Office staff is continuing to adjust to their new roles and responsibilities, and overall, the transition is going well.
