Background Information

- Panorama is a survey tool to help educators gather feedback. Duncanville ISD uses the survey for a variety of purposes. For example, we may use it as a "needs assessment" to determine strengths and areas for improvement around family-school relationships. We may also use the survey to measure change in families' attitudes over time. Administering the survey consistently in consecutive years allows us to identify important trends. In addition, we may use the survey to evaluate the effectiveness of specific programs or interventions as well as gather staff perception data.
- School districts use Panorama's technology platform including surveys to improve how they support students across academics, behavior, attendance, and well-being. Duncanville ISD has used the Panorama Survey and Playbook for the past 2 school years to help support students with social emotional learning. Students are surveyed in the Fall and Spring and schools use the data to make decisions about improving student academic progress, determining the best ways to promote student and wellness, and supporting a feeling of belonging and connection at school.
