Subject: Computer Refresh Program Related Page(s) 2

Information

BACKGROUND INFORMATION:

The Computer Refresh Program (CRP) is an annual project to ensure a proactive approach to replacing aging desktop and laptop computers used by Beeville ISD faculty and staff. The primary goal of this project is to ensure faculty and staff have the appropriate computer hardware to support academic scholarship and achievement, as well as increase productivity and efficiency while supporting the BISD community. BISD aims for a regular refresh cycle of 25 percent of the computers annually to ensure that all eligible computers are on a four-year refresh cycle.
