<ul> <li>Completed Projects:         <ul> <li>During the month of May the exhaust motor in our Dectron pool unit was replace and the fan wheel was repainted to inhibit rusting.</li> <li>During an April visit from Regional Water Authority, the need for a upgraded back flow preventer on our HW Loop was identified. A new backflow preventer has be installed. RWA has returned, inspected, and passed the new piece of equipment.</li> <li>In early May persistent leaks on several flush valves were identified. All but one flu valve was rebuilt. The urinal in the bathroom located outside S-12 received a full r placement.</li> <li>On 6/1-6/2 our Trane Chiller was drained, refilled, and activated. The initial start u and preventative maintenance visit were positive. Oil samples were taken. We are awaiting the results.</li> <li>During the month of April, 42 "fix-it" tickets were closed. This number is not inclusive of time-sensitive maintenance issues reported outside of fix-it. This number is also non-inclusive of the majority of HVAC repairs.</li> </ul> </li> <li>Projects in process:         <ul> <li>A persistent drip has been identified on our Pentair "Superflo" pump located below pool. Parts for refurbishment are in stock.</li> <li>Test results from our pilot water treatment program for our Dual Temp and Hot Water loops remain positive. We have reached and sustained our PH benchmark both loops. High Range Molybdate (corrosion inhibitor) readings are both now above our desired range. Our next treatment and testing will be our first during cooling season.</li> </ul> </li> <li>Vito Esparo</li> <li>Pricities Manager</li> </ul>
