

# Director of Information Technology

City of Wood Dale | Wood Dale, Illinois, United States  
12 days ago

Apply Now

## Description

The City of Wood Dale is seeking a full-time Director of Information Technology. This is a highly skilled and responsible position that directs the administration, operation, and coordination of all aspects of the City's computer network system. The functions of this position are complex and technical in nature, requiring the exercise of judgment and initiative. The IT Director will provide direction and support to staff in all departments and will attend committee and council meetings to present information to elected officials as necessary and requested. This position reports directly to the City Manager.

The responsibilities of this position include, but are not limited to:

- Technology strategy
- Department management and budgeting
- Policy creation and updates
- Project management
- Regulatory compliance
- Data/network security
- Cybersecurity training
- New user onboarding
- Software evaluation, selection, and support
- Software license management
- ERP support and oversight
- Database support
- Website development and support
- Social media support
