

# Board Update

## What A Gift!

Going on three years in Beeville ISD and I continue to be impressed with the level of giving in the Beeville learning community. We have many challenges yet a spirit of giving is the obvious thread that runs through the fabrics of Beeville ISD. The time that each board member gives is a wonderful gift that underscores the belief that we can help every child be successful. It helps so much to lead a district when I am continuously reinforced through word and deed of seven dedicated board members. I know that board members are humble and reluctant to accept the accolades they deserve. At the same time, I think that our board reflects the attitudes of the community as a whole. That of course is why you are in the position you are, as a result of the expectations by your constituents.

We will need to continue to work together as we enter a new year with the challenges of our master plan. Individually we can do little. Collectively we can continue to give this community what they deserve. This community deserves nothing less than an improving school system that values the gift that every parent brings to our district – their children. You know it is interesting that the Christmas story based on the same gift – a child!

## Merry Christmas and Happy New Year
