Did this ever get on the agenda at a board meeting and approved?

Scott

For some reason I assumed that all traffic was coming from School Drive. We need to go narrow with the view to get enough pixels per foot for adequate detail, I just had the camera focused on the wrong area. By moving over and adjusting the same camera and lens proposed we should be able to capture vehicles as they enter the circle drive from W 8th Street or School Drive. I have attached the proposal with an updated drawing reflecting this change. Let me know if this looks better to you.

Thank you!

Hi,
I'd say it looks pretty good. My only concern I can see right away is the xnb-8000 camera for documenting license plates

and drivers. You're correct in the spot you placed that camera covers the 1 way area people have to enter. I'm concerned about the field of view being focused up the street. If it's really that narrow it will miss more than half the people entering the circle drive because they pull in from the left side and would be driving almost parallel to the camera's view. I could be totally wrong but let me know your thoughts on that.

Hello Scott,

Sorry for the delay on getting this to you. I have attached a proposal and drawing for camera additions at the High School per your below email. Take a look and let me know if you have any questions, would like to see any changes, or need additional information.

Thanks!

Subject: potential camera additions

Hi,

Here's a rough outline of what we're looking for with some high school camera additions:

1. Second floor of high school in the hallway corner of storage room 231. That whole region is a dead zone with existing cameras. Thought was that we should put a camera in that corner to cover the hallway and corridor.

2. First floor of high school in the admin hallway over Mr. Whetsell's door opposite end of the hall of camera HS-04. I think we may need a 180 degree camera then we could cover the outside entrance, stairwell, special ed hallway, and admin hallway all in one camera.

3. Outside the circle drive there are two big concerns. One is that we don't have close up enough coverage of the front doors from the outside.

I have an idea on that one, somewhere outside the principals office possibly putting up another 180 degree camera.

Second issue on the circle drive is that I think we need a camera with tighter focus right on part of the driveway where everyone pulls in. I think we could get a camera with the right lens that would focus up close on the cars pulling in so that we could see who is driving the car and the license plate.

Happy to talk more about this when you have time. If anyone wants to come out on site more than welcome to walk around and show the areas as well. Can reach me at 217-565-3048.

Thanks,

Scott Savage

Scott,

Per a conversation with Mr. Bauer, I am forwarding this on to Jeff Stauder so that it can be discussed at the Facilities Committee meeting to be held next Wed Jan 16.

It will then be discussed and decided if it is to go onto the agenda for the January Board Meeting for approval.

Thanks!
