Re: Electric Vehicle Charging Stations

Mr. Scott Ash, as an agent of Presque Isle Electric and Gas, would like the permission of the Board of Commissioners to install 2 electric vehicle charging stations at the Alpena County Regional Airport.

The installation and maintenance of these charging stations will be at no cost to the County. PIE&G will also name the County of Alpena as also insured for any issues that could arise from these stations.

The charging stations will have their own meters, and PIE&G is responsible for supplying electricity at no cost to the County of Alpena.

As a convenience to the passengers using our Airport, and citizens who own electric vehicles, I recommend the installation of these charging stations.

Respectfully

Steven Smigelski
Airport Manager
Alpena County Regional Airport
