QUANAH ISD

TECHNOLOGY REPORT

For the May 2018 School Board Meeting

The QISD Technology director responded to 26 calls for assistance since the April 2018 board meeting. The April 2018 online STAAR testing went smoothly. Additional STAAR testing on the chromebooks takes place in early May. I will be installing some hardware upgrades to our network servers over the summer. Monthly software patches for our district wireless access points, firewall, network switches and iMac computer labs have been installed. iOS 11.3.1 and OSX 10.13.4 have been released for Apple devices. Google Chromebook OS version 66 has been released and deployed to the student chromebooks.
