

**August 2016**

Derby Public Schools

# Monthly Board Report

---

## Technology Department

Eric Conklin, Director of Technology

Technology Department

# 1:1 Laptops

- Laptops have been repaired, cleaned, updated/upgraded, and re-labeled for new school year.
- Laptops used during the SLP & ESY have been prepared for students. All laptops are ready for distribution to students.
- Payments for intentional damage have been coming in from students slowly during the summer.
- We had a minimal number of students that did not turn in laptops at the end of the year, students have been returning laptops to the main office at each school during the summer.
- Laptops will have Windows 10 and all necessary programs installed prior to redistributing them for the 16-17 school year.

# Summer Projects

Technology Department

- Laptops prepared for the new school year.
- New computers: New computers are being installed in all classrooms throughout the district. DHS has been completed, Irving & DMS are near completion.
- Bradley classrooms will also receive the new computers and their current computers will go to the Irving Computer Lab
- Every classroom at Irving and Bradley have received an additional student computer. Every classroom now has 3 students computers. Computers have been updated/upgraded as necessary
- IT & summer help staff are finishing the cleaning of projectors and filters in preparation for new school year.

Technology Department

# Summer Projects

- Bradley School computers have been updated to Windows 10 and will now be moved to the Irving computer lab. All teachers in the district will have the same new computer.
- Installing Neverware Cloud-Ready <http://www.neverware.com/> on older laptops at DMS. This is version of Google Chrome OS that can be installed on any device.
- Updating and configuring all servers, antivirus software, network services in district to run more efficiently when staff returns.
- Preparing guides and training material for teachers to ease their transition to the new computers and Windows 10.
- Preparing Professional Development on-demand for staff return
