

## Site Report – Pilot Point - February

<b>To: Superintendent Kasie Luke and LPSD School Board Members</b>	<b>From: Michele Hughes Head Teacher Elementary Generalist</b>
<b>Outstanding Activities and Events</b>	
Jan 31 to Feb 4- We welcomed Catie Bursch for the fisheries unit. Catie shared engaging and relevant lessons about the salmon's life journey to get to Pilot Point. She also worked with LV 6-10 on all things fishing. Feb 15- Kumi Rattenbury with the Health Department visited Pilot Point. Kumi presented some lessons on hygiene, nutrition, and the importance of getting good sleep to students. Feb 26- Ms. McCarley, our principal, visited the school.	
<b>Personnel</b>	
No new personal. We are very lucky to have Michael Etuckmelra on staff as our aide, PE teacher, and night gym attendant. He is doing a great job!	
<b>Standards Based System/Curriculum Progress</b>	
Standards progress is steady. Elementary students are tracking completed standards in a notebook. They like checking off standards after unit assessments.	
<b>Technology Progress</b>	
All technology is in good working order and used each day to support learning.	
<b>Facility Update</b>	
Facility is in excellent shape.	
<b>LSAC Activity</b>	
Meeting on Feb. 14. Thank you to Rick Luthi, Moon McCarley, and guests for zooming in to update our LSAC with covid information and PiP's covid mitigation document.	
<b>Volunteer Report</b>	
Al Evanoff volunteered to make Soup in a Pumpkin for lunch for students. It was a big hit!	
<b>Professional Development</b>	
February late start was on writing prompt scoring. We had good conversations about scoring prompts.	
<b>Pupil Attendance</b>	
Pip is starting a new attendance program designed to motivate parents and students to get here on time. We have already received positive feedback and improved attendance since the roll out. Thanks Ms. McCarley for your leadership on getting this started and your ongoing support! We have 4 events planned over the next 8 weeks to encourage students to reach 80% attendance to qualify their family to attend the Family Fun Nights and to earn tickets in raffles.	
<b>Student and Staff Safety</b>	
<b>Students and staff are all healthy and appreciating the growing daylight hours.</b>	
<b>Subsistence Calendar</b>	
With improved attendance, students are setting goals to finish the year strong.	
<b>Other</b>	

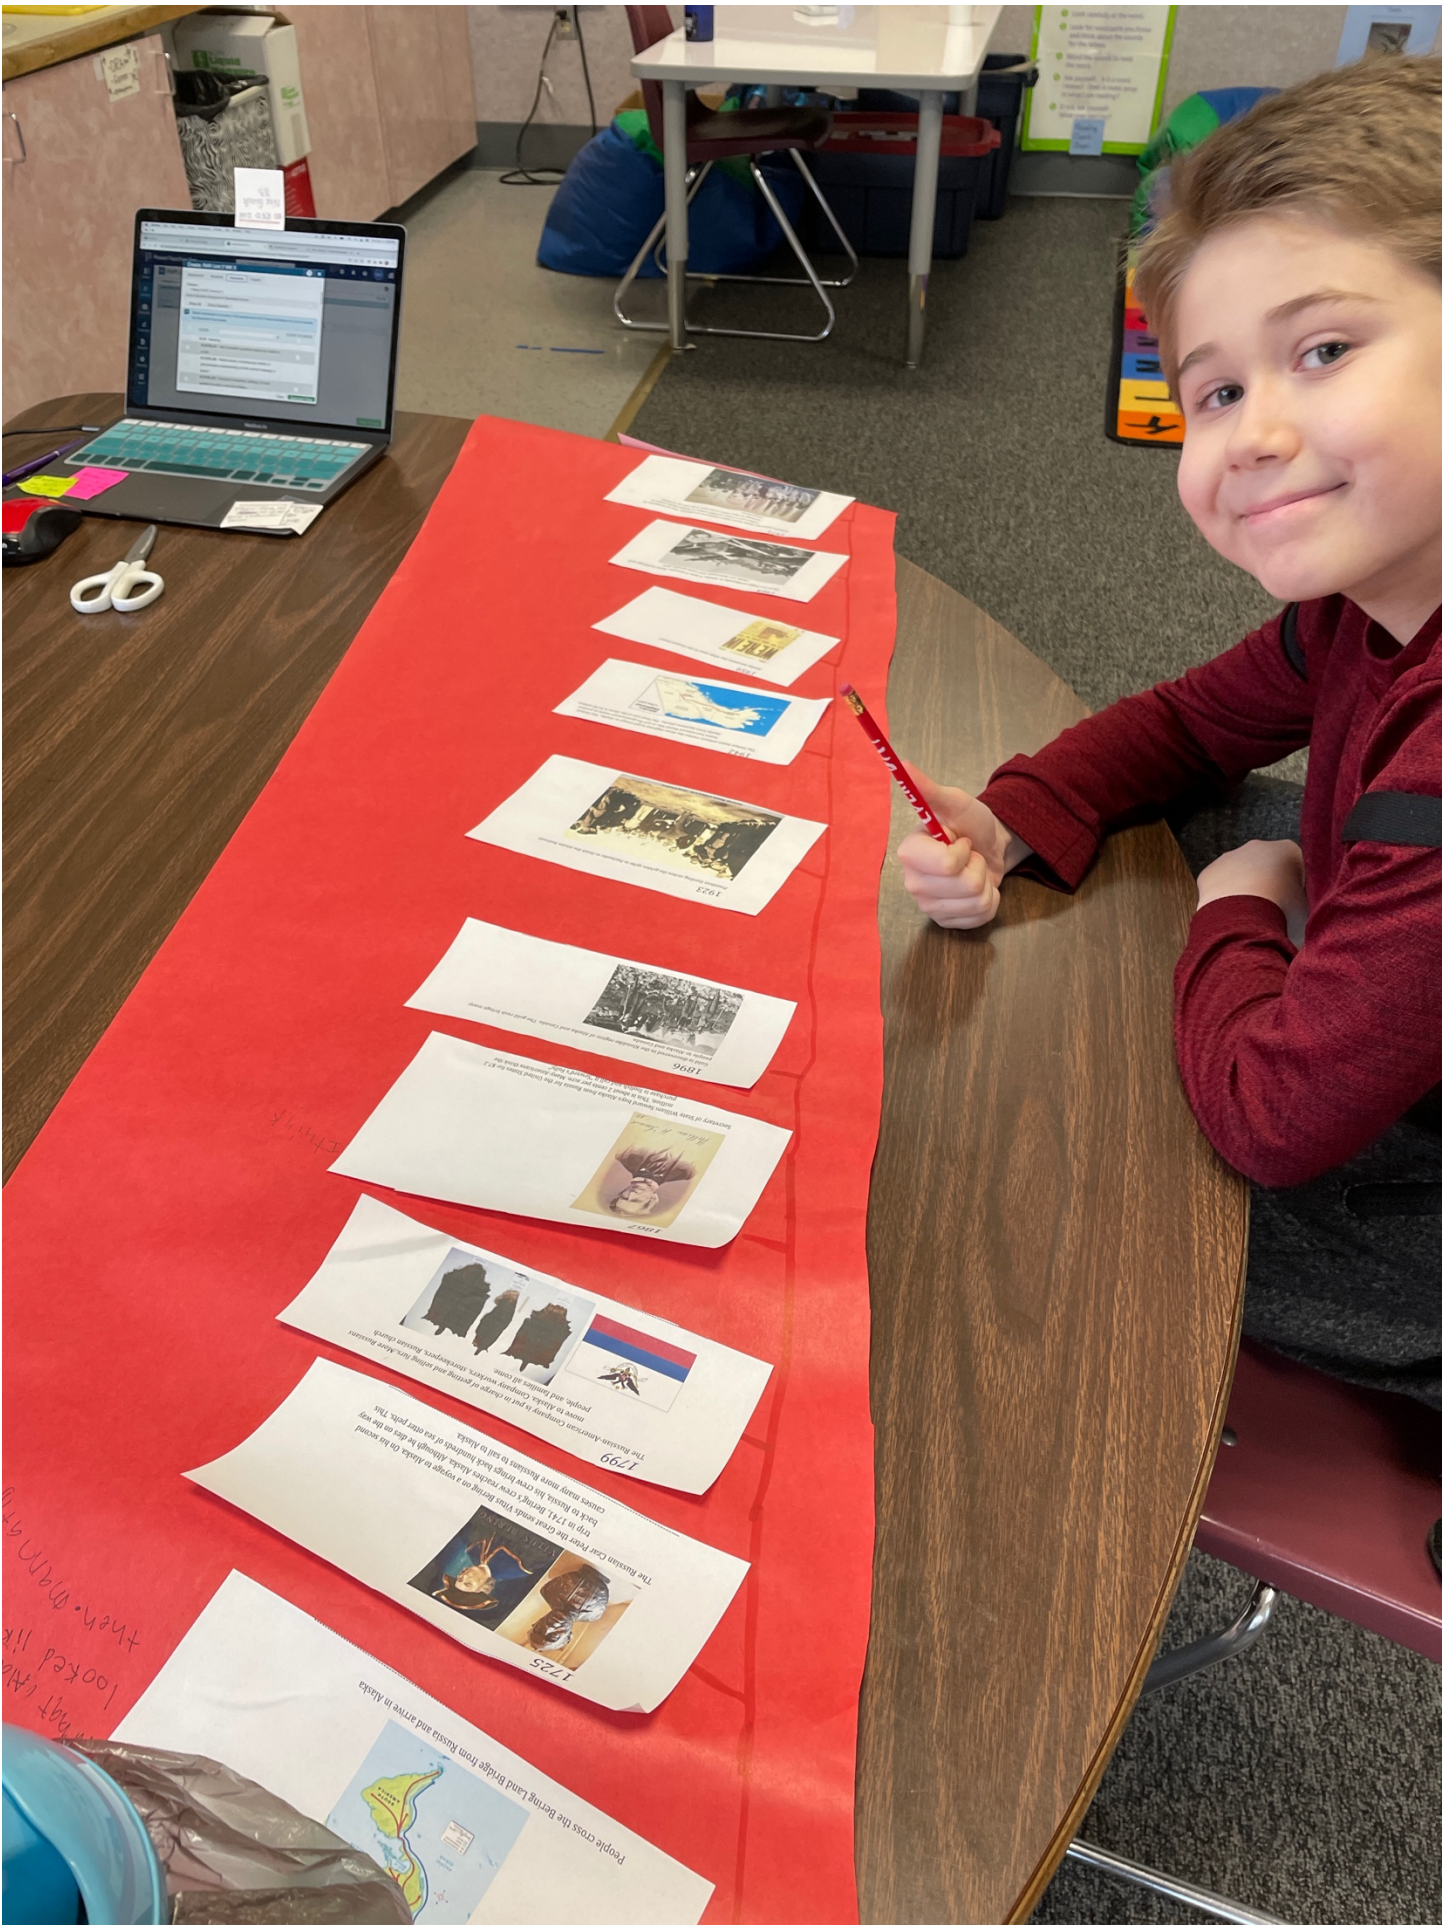

**Valentine's Day Contraption Boxes**

**Al Evanoff guest chef**

1775 People cross the Bering Land Bridge from Russia and arrive in Alaska

1791 The Russian Captain Peter the Great sends Vitus Bering on a voyage to Alaska. On the second trip to Alaska, Bering's crew reaches Alaska. Although he dies on the way back to Russia, his crew brings back hundreds of sea otter pelts. This causes many more Russians to sail to Alaska.

1799 The Russian-American Company takes in charge of getting and selling sea otter skins to people and fur traders in Alaska. Company workers, missionaries, Russian traders, and families arrive.

1802 The Russian-American Company signs the Khasin Treaty with the United States. The treaty gives the United States the right to trade in Alaska.

1804 The first American fur traders arrive in Alaska. They trade sea otter pelts for goods and supplies.

1918 The first American soldiers are sent to Alaska. They are sent to fight in the Aleutian Islands.

1920 The first American oil pipeline is built in Alaska. It is the Alyeska Pipeline.

1924 The first American automobile is driven in Alaska. It is a Ford Model T.

1925 The first American mail plane flies over Alaska. It is a biplane.

1926 The first American airplane lands in Alaska. It is a biplane.

1927 The first American airplane takes off from Alaska. It is a biplane.

1928 The first American airplane flies over the North Pole. It is a biplane.

1929 The first American airplane flies over the South Pole. It is a biplane.

1930 The first American airplane flies over the Arctic Circle. It is a biplane.

1931 The first American airplane flies over the Antarctic Peninsula. It is a biplane.

1932 The first American airplane flies over the continent of Antarctica. It is a biplane.

1933 The first American airplane flies over the continent of Antarctica. It is a biplane.

1934 The first American airplane flies over the continent of Antarctica. It is a biplane.

1935 The first American airplane flies over the continent of Antarctica. It is a biplane.

1936 The first American airplane flies over the continent of Antarctica. It is a biplane.

1937 The first American airplane flies over the continent of Antarctica. It is a biplane.

1938 The first American airplane flies over the continent of Antarctica. It is a biplane.

1939 The first American airplane flies over the continent of Antarctica. It is a biplane.

1940 The first American airplane flies over the continent of Antarctica. It is a biplane.

1941 The first American airplane flies over the continent of Antarctica. It is a biplane.

1942 The first American airplane flies over the continent of Antarctica. It is a biplane.

1943 The first American airplane flies over the continent of Antarctica. It is a biplane.

1944 The first American airplane flies over the continent of Antarctica. It is a biplane.

1945 The first American airplane flies over the continent of Antarctica. It is a biplane.

1946 The first American airplane flies over the continent of Antarctica. It is a biplane.

1947 The first American airplane flies over the continent of Antarctica. It is a biplane.

1948 The first American airplane flies over the continent of Antarctica. It is a biplane.

1949 The first American airplane flies over the continent of Antarctica. It is a biplane.

1950 The first American airplane flies over the continent of Antarctica. It is a biplane.

1951 The first American airplane flies over the continent of Antarctica. It is a biplane.

1952 The first American airplane flies over the continent of Antarctica. It is a biplane.

1953 The first American airplane flies over the continent of Antarctica. It is a biplane.

1954 The first American airplane flies over the continent of Antarctica. It is a biplane.

1955 The first American airplane flies over the continent of Antarctica. It is a biplane.

1956 The first American airplane flies over the continent of Antarctica. It is a biplane.

1957 The first American airplane flies over the continent of Antarctica. It is a biplane.

1958 The first American airplane flies over the continent of Antarctica. It is a biplane.

1959 The first American airplane flies over the continent of Antarctica. It is a biplane.

1960 The first American airplane flies over the continent of Antarctica. It is a biplane.

1961 The first American airplane flies over the continent of Antarctica. It is a biplane.

1962 The first American airplane flies over the continent of Antarctica. It is a biplane.

1963 The first American airplane flies over the continent of Antarctica. It is a biplane.

1964 The first American airplane flies over the continent of Antarctica. It is a biplane.

1965 The first American airplane flies over the continent of Antarctica. It is a biplane.

1966 The first American airplane flies over the continent of Antarctica. It is a biplane.

1967 The first American airplane flies over the continent of Antarctica. It is a biplane.

1968 The first American airplane flies over the continent of Antarctica. It is a biplane.

1969 The first American airplane flies over the continent of Antarctica. It is a biplane.

1970 The first American airplane flies over the continent of Antarctica. It is a biplane.

1971 The first American airplane flies over the continent of Antarctica. It is a biplane.

1972 The first American airplane flies over the continent of Antarctica. It is a biplane.

1973 The first American airplane flies over the continent of Antarctica. It is a biplane.

1974 The first American airplane flies over the continent of Antarctica. It is a biplane.

1975 The first American airplane flies over the continent of Antarctica. It is a biplane.

1976 The first American airplane flies over the continent of Antarctica. It is a biplane.

1977 The first American airplane flies over the continent of Antarctica. It is a biplane.

1978 The first American airplane flies over the continent of Antarctica. It is a biplane.

1979 The first American airplane flies over the continent of Antarctica. It is a biplane.

1980 The first American airplane flies over the continent of Antarctica. It is a biplane.

1981 The first American airplane flies over the continent of Antarctica. It is a biplane.

1982 The first American airplane flies over the continent of Antarctica. It is a biplane.

1983 The first American airplane flies over the continent of Antarctica. It is a biplane.

1984 The first American airplane flies over the continent of Antarctica. It is a biplane.

1985 The first American airplane flies over the continent of Antarctica. It is a biplane.

1986 The first American airplane flies over the continent of Antarctica. It is a biplane.

1987 The first American airplane flies over the continent of Antarctica. It is a biplane.

1988 The first American airplane flies over the continent of Antarctica. It is a biplane.

1989 The first American airplane flies over the continent of Antarctica. It is a biplane.

1990 The first American airplane flies over the continent of Antarctica. It is a biplane.

1991 The first American airplane flies over the continent of Antarctica. It is a biplane.

1992 The first American airplane flies over the continent of Antarctica. It is a biplane.

1993 The first American airplane flies over the continent of Antarctica. It is a biplane.

1994 The first American airplane flies over the continent of Antarctica. It is a biplane.

1995 The first American airplane flies over the continent of Antarctica. It is a biplane.

1996 The first American airplane flies over the continent of Antarctica. It is a biplane.

1997 The first American airplane flies over the continent of Antarctica. It is a biplane.

1998 The first American airplane flies over the continent of Antarctica. It is a biplane.

1999 The first American airplane flies over the continent of Antarctica. It is a biplane.

2000 The first American airplane flies over the continent of Antarctica. It is a biplane.

2001 The first American airplane flies over the continent of Antarctica. It is a biplane.

2002 The first American airplane flies over the continent of Antarctica. It is a biplane.

2003 The first American airplane flies over the continent of Antarctica. It is a biplane.

2004 The first American airplane flies over the continent of Antarctica. It is a biplane.

2005 The first American airplane flies over the continent of Antarctica. It is a biplane.

2006 The first American airplane flies over the continent of Antarctica. It is a biplane.

2007 The first American airplane flies over the continent of Antarctica. It is a biplane.

2008 The first American airplane flies over the continent of Antarctica. It is a biplane.

2009 The first American airplane flies over the continent of Antarctica. It is a biplane.

2010 The first American airplane flies over the continent of Antarctica. It is a biplane.

2011 The first American airplane flies over the continent of Antarctica. It is a biplane.

2012 The first American airplane flies over the continent of Antarctica. It is a biplane.

2013 The first American airplane flies over the continent of Antarctica. It is a biplane.

2014 The first American airplane flies over the continent of Antarctica. It is a biplane.

2015 The first American airplane flies over the continent of Antarctica. It is a biplane.

2016 The first American airplane flies over the continent of Antarctica. It is a biplane.

2017 The first American airplane flies over the continent of Antarctica. It is a biplane.

2018 The first American airplane flies over the continent of Antarctica. It is a biplane.

2019 The first American airplane flies over the continent of Antarctica. It is a biplane.

2020 The first American airplane flies over the continent of Antarctica. It is a biplane.

2021 The first American airplane flies over the continent of Antarctica. It is a biplane.

2022 The first American airplane flies over the continent of Antarctica. It is a biplane.

2023 The first American airplane flies over the continent of Antarctica. It is a biplane.

2024 The first American airplane flies over the continent of Antarctica. It is a biplane.

2025 The first American airplane flies over the continent of Antarctica. It is a biplane.

what Alaska looked like then. (written vertically on the left side of the red paper)
