

SOLAR FOR TEXAS ISD'S

REDUCE YOUR ENERGY COSTS WITH NOTHING OUT-OF-POCKET

IMMEDIATE SAVINGS

Generate savings from Day 1 with nothing out-of-pocket

BUDGET CERTAINTY

Receive solar energy at a fixed price that is lower than grid power

CONSISTENT

Solar provides energy onsite every time the sun comes up

LONG TERM

Receive savings up to 25 years

HOW IT WORKS

Without any upfront investment, the ISD is able to adopt solar and begin saving money as soon as the system is installed and becomes operational.

Solar PPA's and ESA's provide an avenue that can guarantee savings through a contractual agreement.

From the moment the system is installed, it produces power and brings savings to the district for up to 20-25 years.

ADDITIONAL DETAILS

The ISD has no risk. Solar One will operate, insure, maintain, and monitor the system while the district's only obligation is to purchase power produced by the solar system, just like you do from your local utility.
