District Board Talking Points

October 2018

With the upcoming gubernatorial election and legislative session, there exists a sense of optimism for increased investments in education. Although there are differences in the governor candidates' positions, both share similar themes to improve our P-20 system.

- Significant increase to education funding
- Increased school year
- Accountability for performance in third grade reading and high school graduation

In addition, the legislature formed a joint committee on student success. This bipartisan group hopes to tackle the problem of inadequate, unstable education funding that has crippled our state since the passage of Measure 5 in 1991.

It will be an interesting year!
