SHEESHAM WOOD INFORMATION

Sheesham furniture is very popular in Indian subcontinent. But homeowners are often ignorant about what is Sheesham wood. In order to make an informed decision before buying Sheesham furniture, it is important that you know about it. So this article covers the following aspects:

Sheesham wood is also known as Dalbergia Sisso, a deciduous tree, called Sheesham in the Indian subcontinent. It is grown across the length and breadth of the sub-Himalayan region, extending from Assam in the east to River Indus. These forests go all the way across Punjab, Uttar Pradesh, West Bengal and Assam. Here, it is known by various names, like Sheesham, Shishan, Shisham, Sissoo or Sisu.

Sheesham tree: It is the state tree of the Indian state of Punjab where this wood ranks No. 2 after teak in size of cultivation. It has various applications apart from supplying timber, such as being planted on roadsides and on tea plantations for shade and along canals.

This tree usually grows along riverbanks below an elevation of 900 meters but can go up to 1,300 m. It grows best in temperatures ranging from 10°C to 40°C. It can withstand an average yearly rainfall of a maximum of 2,000 mm and droughts not exceeding three to four months. Sheesham grows best in pure sand and gravel and rich soil of riverbanks and can also flourish in slightly salty soils.

Features: Sheesham wood ranges from being golden brown to a dark brown or chestnut color with darker streaks that give this wood a rich and lustrous appearance. The wood is sturdy and tough with a straight grain, though it could also be found to be interlocked. Its texture ranges from medium to coarse with a natural luster.

Benefits of Sheesham wood

- It has an innate resistance to decay and is popular for woodcarving and for engraving goods in India.
- This wood neither warps nor splits, so it is highly used for making cabinets and other furniture.
- Highly durable wood and offers great resistance to dry-wood termites.
- Due to its toughness cutting and sawing could be a big challenge, but it is great for turnery.
- It shines under polishing and has a smooth finish.
- The grain is so well defined that each piece of Sheesham furniture often has its own unique color. This wood accepts hand waxing which gives it a smooth surface.
- This wood has applications in marine and aircraft plywood, as charcoal for cooking and heating food, making musical instruments, ornamental turnery, sporting goods and for carving and engraving.
- It is also used for making doors and windows, while its root wood is often used for making tobacco pipes.
- Sheesham wood accepts a good polish and gives a smooth finish and luster.

Characteristics of Sheesham Wood

Sheesham wood or Indian Rosewood, is found largely in India, but also in Pakistan and Nepal. Sheesham trees have a life of 22 years during which period they attain a height of 30 meters. Their diameter is a maximum of 1.5 meters, and they are known to produce heavy and dense wood.

The strength of the wood of these trees is excellent and unparalleled, rendering it the obvious choice for high quality wooden furniture. Once polished, the wood shows up a smooth and extremely attractive surface. Its grain makes each piece of furniture absolutely unique and highly sought-after.

PORTER WARRANTY

PORTER DESIGNS LIMITED CASE GOOD WARRANTY

Porter Designs warrants its residential case goods products to be free from defects in material and workmanship under normal use and service for a period of one (1) year from the date of purchase. This limited warranty applies exclusively to the benefit of the original purchaser of the product under conditions of normal residential usage only and will terminate in the event of resale or commercial use. Any product modifications by the consumer, or use of non-Porter Designs parts, voids the warranty. All warranty claims must be accompanied by the original dated proof of purchase and contain a brief description of the defect in question.

Porter Designs case goods are made with a variety of natural materials. These include, but are not limited to, various wood and plant species, stones and minerals, and certain animal by-products. Certain changes in these materials over time are expected and are not considered defects and are not covered by the limited warranty. For example:

- a. Organic materials have inherent variations. Wood will have knots, cracks, splits and uneven edges. Stone and marble contain vein-lines, hairline fissures, pores and color variations. These natural characteristics are not considered defects. Because stone and wood are porous, spills allowed to seep in may not be removable. Wipe any spills immediately.
- b. Each piece is truly unique due to the individual attention it receives. This is a result of the varying application techniques that are hand crafted. These variations are not considered a defect.
- c. Natural color changes, variations, or movement in lumber or veneer products, and exposure to extreme temperature changes and/or direct sunlight, may cause color and/or surface changes which are not considered defects.

This warranty supersedes and replaces all implied warranties of merchantability and for particular purpose. No representative, employee, agent of Porter Designs, or any other person is authorized to assume for Porter Designs any additional liability or responsibility in connection with Porter Designs' merchandise except as described above. In no event shall Porter Designs be liable for indirect, consequential or incidental damages of any kind such as damage to other property owned by the purchaser, personal injuries sustained by the purchaser, lost profits, loss of use or other economic loss, nor shall its liability exceed the purchase price of the product. Porter Designs may examine the product and will decide, at its sole discretion if it is covered under this limited warranty. If within the warranty period, identical materials are unavailable at the time of the repair or replacement, Porter Designs reserves the right to substitute materials of equal or better quality. Replacement pieces may vary from the original due to differences in color, natural grain character or live edges. Porter Designs is not obligated to refund money to the purchaser. Any item repaired or replaced under these warranties will be covered by the warranties for the remainder of the original warranty period only. All repair work must be authorized by Porter Designs in advance.

DELUXE FURNISHINGS – MATTRESS WARRANTY

10 YEAR LIMITED WARRANTY

WHAT IS COVERED:

Deluxe Home Of USA Inc/Delandis warrants your Mattress, for a period of ten (10) years from the date of purchase against defects in workmanship and materials. During this Limited Warranty period, if the product is deemed to be defective, our responsibility for the defective product is limited to repair or replacement as stated below. All transportation costs are the responsibility of the purchaser during the entire Limited Warranty period. Your mattress will be replaced or repaired, at our option, should it be found defective because of faulty workmanship or structural defects subject to specific limitations contained herein.

WHAT IS NOT COVERED: It is understood that this does not include normal increase of softness in the foam which can occur during normal breaking in, or in the case of visco-elastic memory foam, a lessening of the gradual recovery aspect of the foam, of which such lessening, should it occur, does not reduce the continual pressure reducing and pressure relief properties of the mattress. Substitution or use of improper foundations, platforms or other bases upon which the mattress is placed, may result in damage to the product. Should an improper base be utilized by the consumer, causing the product to default, the Warranty may be voided. It is incumbent on the consumer to maintain the foundation and provide appropriate support for the mattress. We recommend the purchase of a foundation at the time of mattress purchase to ensure that it is appropriate for use with your mattress.

This Limited Warranty does not include any deterioration of the foam, with an indentation of less than 1.5 inches, not associated with a sag in the foundation, box spring, platform or frame. If such a defect appears during the ten (10) years of this Limited Warranty, we will, at our option, either repair or replace the mattress at a handling cost to be paid by the purchaser. This Warranty does not include handles, as handles are to be used only for adjustment purposes and are not intended to be used to lift, turn or transport the product. If a model has been discontinued we will replace it with a mattress of equal or better value at our option.

The cover on the mattress is Warranted for two (2) years for defects in material or workmanship. Do not remove the mattress cover under any circumstances. This Limited Warranty is void if the cover has been removed at any time. Removal of the cover affects the flammability performance of your mattress and is not designed for laundering or other care. Removing the mattress cover will damage the fire protection and pose health and safety risks. This Limited Warranty is void if the product is found to have been tampered with or misused by the purchaser beyond reasonable wear, and shall not apply if the product has been physically damaged intentionally or due to accident and/or neglect; including burns, cuts, water damage, mold, stains, or is otherwise abnormally soiled or unsanitary. Do not use a heating pad or electric blanket with this mattress as it will void this Limited Warranty. It is recommended that the consumer protects the mattress with a stain resistant mattress protector.

This Limited Warranty also does not apply, and there is no Warranty coverage for, damage to the mattress caused by misuse, including, but not limited to damage caused by fire, flooding, roughhousing, inadequate support or excessive weight imposed upon it. All mattresses sought

MATTRESS UNWRAPPING

Step 1: After removing the compressed mattress from the box place it on the bed frame where your mattress will ultimately be so you don't have to move it after it decompresses.

Step 2: Carefully remove the outer plastic cover with scissors. Exercise care and remove the plastic cover by hand.

Step 3: Gently pull the compressed product to unroll it. At this point, you may need to flip it over so the underside of the mattress is on the bed frame.

Step 4: Carefully trim the inner plastic cover with scissors to start the mattress decompression. Gently pull away the inner plastic cover and discard.

Tips

- Please allow 24 to 72 hours for your Mattress to regain its full shape.
- We DO NOT recommend use of an electric blanket or pad with this mattress.
- In cold temperature, at delivery, your mattress may take a bit longer to return to full sized from its compressed state.

WARNING: Do not remove the mattress cover under any circumstances. Removing the mattress cover will damage the fire protection and pose health and safety risks.

MATTRESS CARE TIPS

Mattress Cleaning

DO NOT REMOVE OR WASH COVER. Spot Clean only. To spot clean, Vacuum your mattress, sprinkle some baking soda on it. Use a scrub brush to gently rub the powder into the mattress and leave it for 10 minutes or so. Vacuum the excess powder.

- Do not wash.
- Do not use bleach.
- Do not machine dry.
- Do not iron.
- Do not dry clean.

Airing Out Your Mattress

Foam mattresses typically have a mild residual scent distinct to the product when new. This is sometimes heightened when delivered during cold weather. It will quickly dissipate as the mattress is used daily, allowing the open cells to expel the "processing" air and take in new air.
