

Executive Summary: Public Works Mutual Aid and Road Salt Purchase Agreement

Introduction

The purpose of this report is to seek Board of Education approval for entering into an intergovernmental agreement (IGA) with the Village of Davis Junction for the purchase of road salt for the upcoming winter plowing season. This partnership will allow the District to secure salt at a more favorable rate, ensure reliable supply, and reduce the operational burden of procuring and storing material independently.

Rationale

This agreement provides both cost savings and operational efficiency. It guarantees access to a consistent supply of salt, and strengthens our collaborative relationship with the Village of Davis Junction. The District will only be responsible for the cost of the salt purchased with no additional administrative fees.

Approval of this IGA will ensure the District is fully prepared for winter operations and able to maintain safe and accessible facilities during inclement weather.

Recommendation

It is recommended the Board consider the approval of *A Resolution Approving an Agreement For Public Works Mutual Aid and Providing for the Purchase of Road Salt by and Between the Village of Davis Junction and Meridian Community Unit School District 223*.
