Re: Reject Bids for EPHS Plaza and Parking Lot Renovation

The Business office requests authorization to reject bids as presented for the EPHS Plaza and Parking Lot Renovation. This project was to renovate the space outside the south entrance to create an educational space, increase accessibility, and beautify the area. Additionally, this project would have updated the south parking lot and included EV charging stations.

The district received multiple bids. In considering the base bid plus alternates and the various bid packages, the total project would have cost \$1,182,570. This amount was higher than the allocated budget for the project which is the main reason for requesting the board to reject the bids.

The district will look to adjust the available budget for this project and include it in future planning.
