Coffman Cove update for March!

This has been a super busy month! We had eight students compete in the State Archery tournament. Two students placed in the top 5 for their divisions in the state. We had two new students come to Coffman Cove School this month; we are very excited to have them!

As a school, we had the opportunity to go to Kassan's Culture camp. This was a wonderful opportunity for us to make copper shields, weave headbands, and watch a sea otter harvest. This was a once-in-a-lifetime opportunity for most of our students and we are eternally grateful! Thank you to the Kassan School and community! In addition, our older students attended and two students competed in NYO, it was a great experience!

In class, we have also been working on clean energy Olympics, building our windmills, and powering a small structure the students are making! We have been working on identifying marine life in science, making some great tide-pooling field trips! Lastly, we had a music teacher from the island come out and teach a Ukulele class with our students.

Updates from our ASC

Our students are working on fundraising for sporting events. The ASC is working on getting ready for graduation in May and opportunities for students over the summer!

Thank you all for your time!
