

6. MONITORING REPORT – 2025-2026 School Improvement Plans

A. SUBJECT

This item is included on the agenda so the Board of Education can be updated on plans the schools have developed to improve student outcomes in line with the District's Strategic Plan.

B. INFORMATION

Annually schools review all types of data to determine the goals and objectives they believe will lead to the improvement of the academic achievement of their students. Each school forms a team that analyzes and discusses the data from state test results, district benchmarking results, school level assessments, student discipline, parent surveys, and many other pieces of information. This year, plans were developed to ensure the best possible education for students in order to meet their academic and social emotional needs.

Tonight, representatives from each level, Elementary, Middle School, and High School will discuss their academic and social emotional goals for the 2025-2026 school year.

This is an informational report only. No formal Board action is required.
