As a result of the formal procurement, three vendors submitted proposals to the District’s request for Occupational Therapy Services.

Pricing for the three proposers is indicated in the table above, and appears to be in line with previously requested services. It will be incumbent upon the evaluation team to perform routine reviews of all documents to ensure responsiveness, labor rates, and qualifications of those performing service delivery.

Any alterations or modifications to the contract’s Statement of Work which may occur during service delivery, will be addressed through a bilateral contract amendment process.
