

BPS Activities Board Report March-April 2021

~Sports~

Softball-

Softball has shown tremendous growth through out this season where umpires at the beginning of the season commented several times on the improvement of the Softball team. All though their record doesn't do the team justice, witnessing growth and hearing about growth as a team from several umpires and schools can attest to the improvements made in each position on and off the field.

Track-

Track season is nearing the end of the season with Divisionals and State meets are right around the corner, the athletes are setting Personal Records (PR's) at every meet. Right now we have one of the top 800 meter runners in the Class rankings and are poised to make a statement at the state meet. Watching this young man during practice and seeing times on Athletic.net proves he is out to make noise for Browning. His teammates are complimenting and are right behind him.

For the girls on the track team, we have a smaller team with 4 total girls this season. But all girls are complimenting each other and pushing to better themselves at every meet and practice. One of the girls is setting PR's at every meet and is looking to place at the Divisional meet and State meet.

Activities-

Right now, most coaches are working together to help each other and more importantly, our athletes after school. Confidence is showing with competition athletes (track and Softball) and non-competition athletes (students who are not in a Spring Sport). Recently we had a group of gentlemen competing in an out of state basketball tournament placing 2nd in an All Native Basketball Tournament. We also have several athletes that are traveling to out of state tournaments in states such as California, Washington, Idaho, and Colorado for basketball tournaments.

The gym area and weightroom, plus other facilities have been open to students after school for skill development. Team practicing will begin in June when Head Coaches and staff can work with more team oriented drills.
