Community Education works to provide district residents of all ages opportunities to be safe, healthy and fit.

Elementary, junior high and senior high students receive instruction on how to be safe around water. Students also get the benefit of working out and being fit each and every time they enter the pool area. There are no wasted minutes at the pool. For some of our students this is the only instruction they may receive on learning how to swim and we make the most of it. Students are referred to Community Education programs that can further their instruction.

Community Education continues to offer a comprehensive aquatics program for the community. We offer quality at an affordable price. We have activities for all ages promoting health, fitness and safety. Throughout the year Red Cross swim lessons are offered for children 6 months old through adulthood. The senior exercise and lap swim programs continue to grow. People want to be fit and healthy and socialize a little, too.

Our three swim teams; girls swimming and diving, boys swimming and diving and synchronized swim continue to attract students. This year's synchronized swim team took third place at state!
