

Traps of a Trafficker Interactive Youth Prevention Program

Learning Objectives:

- 1) **Expose the trap.** Recruiters are setting traps for American children that have just the right bait to lure them into their clutches. Some traps are more obvious than others. This program teaches children and teens how the traffickers are out trick, trap and lure them.
- 2) **Reveal the bad decisions.** Youth think they are invincible. Age-appropriate case studies illustrate how one bad decision has forever changed the lives of real children and teens just like them.
- 3) **Show their hiding places.** Recruiters and traffickers hang out where our children do - on the internet, on their cell phones, in our malls, walking the hallways of our schools, etc. The Traps program takes away their hiding places by teaching youth how and where they are hiding – right where they are hanging out.
- 4) **Teach them how to stay invincible.** Equip youth with tools to stay safe – what things to NEVER do and what things to ALWAYS do.
- 5) **Spur them into action.** Help youth develop an understanding of the red flags of a friend who is being trafficked and help them realize they can help fight this crime.
