

Electricity Supply Review

Current Electric Contract

Energy Market Update

- The electricity market is still seeing retiring coal plants, increasing demand from automation, and data centers
- Long-term rates currently more favorable than short-term.

Historical Pricing Energy (RTC)

Start Mo	Term (months)	Price* (\$/MWh)	Daily Change	Weekly Change	Monthly Change
Jan 26	12 (Cal 2026)	\$39.68	(\$0.95)	(\$3.23)	(\$1.33)
Jan 27	12 (Cal 2027)	\$37.31	(\$0.54)	(\$2.39)	(\$1.87)
Jan 28	12 (Cal 2028)	\$35.43	(\$0.37)	(\$2.11)	(\$2.76)
Jan 29	12 (Cal 2029)	\$33.43	(\$0.43)	(\$2.39)	(\$3.26)
Jan 30	12 (Cal 2030)	\$31.89	(\$0.45)	(\$2.29)	(\$2.99)

Capacity costs increasing for all ComEd users on June 1st

- **What is capacity?** Payments to generators to keep enough **reserve electricity** to meet spikes in demand.
- **Where is capacity listed on the bill?** Within the **supply price**—it accounts for ~20% of your rate.
- **Capacity costs are increasing 800%. How will this affect my total cost?** Expected impact is **2.35 cents/kWh**, roughly a 35% increase, beginning June 1, 2025. **20-25% budgetary impact expected**

Electric Supply Results: Fixed Energy+losses with 100% Green-E REC's

- Three valid responses received by RFP deadline – it's a volatile market day and Direct and Constellation have both halted pricing for today.
- Low-bid is Direct for the 1-yr and Freepoint for all other terms.
- The market is backwardated, with the lowest available terms being the longest ones.
