

Board Report

For

September 12, 2016

Maintenance:

It's been really busy since school has started. Things have started to slow down enough that we are starting to work on maintenance requests. I have replaced the big hot water heater in the JR High boiler room just before school started. Rocky cleaned out storage rooms and locker rooms over at the JR High this summer. Rocky and I have replaced a couple of ballast on the southeast stadium light pole and now I have called someone to come change light bulbs. We are trying to catch up with what we didn't get done this summer.

Transportation:

WELL, we started out with one new bus giving some trouble, but it was a quick fix. I hope by this meeting that bus #54 is out of the shop. Can explain at meeting.
