WAC Inaugural Motor Castings Scholarship

In 1992, Motor Casting Company, donated \$10,000 to the WAC Business Department to further business education. The business department used the funds to establish an investment club which invested in stocks. Each year the club reviewed the portfolio to make decisions that would create the most optimal financial future. The investment club's activities ceased in 2012 with an ending balance of over \$400,000. This balance is largely due to a profitable investments in Fiserv Financial Services, Microsoft, Corporation, and Facebook Inc.

To continue to honor the purpose of the original donation, the proceeds earned by WAC's Investment Club is used to fund scholarships that encourage post-secondary career development in Career and Technical Education career fields.

The inaugural winner of this award is Debra Snyder. This scholarship has helped Debra in many ways and she is honored to be the first recipient. Debra plans to study diagnostic medical sonography. She also plans to spread awareness about what WAC Motor Casting stands for, to continue to spread their story, and to shed light on the value and importance of CTE courses.

FACES: Caitlin Supple
