

Special Education Board Report, December 2019

ISD General Supervision Tool:

This document will be used by the State department to monitor the ISD. Our direction from the State was to use this as a self assessment tool this year while it is piloted with 6 ISD's. The team has been reviewing the document to see what we already have implemented and what still needs to be put into place. At that point we will prioritize and start to build systems that need to be implemented.

Early Childhood Special Education:

The Hillsdale County ISD Early Childhood Department in collaboration with the Great Start Collaborative and numerous local agencies and volunteers, hosted the annual Winterfest event on December 12th at Greenfield School. The event was a success providing food, fun and family engagement to 81 children and their family members. The night included an opportunity to meet Santa and take pictures and enjoy a family meal of hotdogs, mac-n-cheese (donated by Saucy dogs), salad (donated by Olivia's), Cookies (donated by Jonesville Bakery & Market House) and chips (provided by Community Action Agency). Activities included various holiday craft activities, an obstacle course and STEM project. A great time was had by all.

Certificate of Completion:

The State of Michigan mandates we need a board approved criteria for our Certificate of Completion. Our MOCI, Young Adult Program, Transition Coordinator and administration have completed a proposed document for the board to consider.
