January In-Service Day

Our annual Professional Development Day will be January 18th at the middle school. Breakout sessions will be conducted by our in-house experts and include a various assortment of topics from technology in the classroom to evidence based instructional strategies. We greatly appreciate the willingness of our staff to share best practices with others and are excited for a day of learning from each other.

Idaho's School Report Website

The State Department along with the State Board of Education have created a new reporting website. The website provides both basic overview information as well as academic and non-academic indicators for each school in the state. I will provide a brief preview of the report card during the meeting.
