Online Curriculum update:

This past year we have reviewed and updated our core online curriculum platforms that are used through MEC. This process was done in tandem with IMESD's virtual school curriculum adoption which allowed us to also hear from a variety of other teachers in the region that use virtual learning platforms. We have broken the virtual adoption into 7-12 virtual programs and credit recovery and K-6 virtual programs. For the K-6 group we selected Accelerate Learning and 7-12 we have identified Edmentum as platforms that best meet our student learning needs.

There were several reasons behind this decision.

1. Our existing virtual platform, Acellus, did not offer appropriate learning support for learners at any grade level.
2. Edmentum and Accelerate Learning both offer a variety of supports for student learning.
3. Both programs offer the flexibility of teacher directed assignments.
4. Parents are able to monitor their student progress directly through parent logins.

ODE does not have a formal timeline for the adoption of virtual learning platforms, but has added the process to the state Division 22 reporting requirements. We will continue to annually review our learning platforms to make sure we are offering our families the best virtual learning opportunities possible.
