

December 11, 2014

Agenda Item: VIII H **Action – Expanding Learning Opportunities**

Purpose: To provide the board an opportunity to review and approve new course proposals for students at MHS.

Background:

As part of Strategic Priorities 3.8 and 3.11, MHS administration and teacher-leaders have developed course descriptions for new offerings beginning in 2015-16.

Giving students an opportunity to forecast for these new offerings this winter is essential for the high school scheduling process. Further work must be done during the budget process to determine levels of funding available (especially in the case of Project Lead the Way), but having the student forecasting data in place will position the district to move quickly should it be financially viable.
