

November 2025 Technology Report

As we approach the end of the 1st semester of the 2025-2026 school year, here are some of the things that have been going on with the Illini Central Technology Department.

1. One of the students in The Class & I were able to put together a Veterans Day video that I believe surpassed the ones we have created in the past. Christian Mucciante, who will be graduating at the semester to leave for the Marines, planned out the recording of a number of students for this video. The students ranging from 4th grade through 12th grade were asked to discuss what veterans meant to them. I was able to record each class in the grade school “thanking” our veterans for their service. I was asked if it would be possible to live stream the Veterans Day Assembly this year. We had done it once before during my time as the Director of Technology, but this year with all that I have learned in streaming games & other events I feel we were able to do justice to a ceremony that is already very good for those who cannot attend.
2. A request had been made to Dr. Durbin a while back regarding Illini Central finding a way to share/post records on some sort of video board. During this semester, I was able to set up two Wall of Fame devices. One of them is outside of the high school office and the other is in the atrium of the new edition. The amount of content that can be added to these devices is almost unlimited. We have big plans for the direction that we are going to go with our “Wall of Fame.” The process of getting content to the company we are working with will be time consuming and I will have to chip away at getting the devices where we want them to be in the future. The devices will be a living record of all things Illini Central.
