

GREEN CLEANING

In furtherance of its concern for the health of its students and staff and in compliance with Illinois law, the School District shall implement and maintain standards for green cleaning.

Except as otherwise provided in the Policy, each school in the District shall use only environmentally-sensitive cleaning and maintenance products, to the extent established by and in accordance with the guidelines of the Illinois Green Government Coordinating Council (IGGCC), for all in-house and contracted cleaning services.

Since the District has established green cleaning protocols it may deplete its cleaning and maintenance supplies in accordance with IGGCC guidelines while purchasing and using the environmentally-sensitive cleaning and maintenance products.
