Memorandum

To: Andrea Oquist, Superintendent

From: Stacy Jenkins, Administrator of Communications

Re: District Notification System

We are very excited to inform the Board of Education that we are moving forward with a contract to secure district notification system services with a company called School Messenger.

I am requesting this topic be added to the March 16, 2020, Committee of the Whole agenda, so I can provide the Board with a detailed description of the new system.

As a point of background, the district currently uses a system that is contracted by Wayne RESA. Over the course of the past several years, we have not been satisfied with many aspects of the current system, including the crucial piece of reliability.

I would be happy to describe the new system and provide details of the features it includes. We are confident that the new system will greatly improve our email, phone and text messaging communications both at the district and school levels.

Thank you for your consideration!
