

ALC updates from Student Representative's Joniya Metcalf and Destiny Williams.

In the last several months, we have had a bunch of fun on several ALC excursions including going bowling, hiking at Tischer Creek & doing water ecology, Ice fishing at Caribou Lake, and some college visits. We also have monthly staff versus students basketball games at the YMCA. Once per month we are lucky enough to have special lunches brought in from places like Jimmy Johns, McDonalds, and Olive Garden.

Students have been busy working on classes for the third quarter and staying after school to work on credit recovery and to catch up on missing work. We are also currently raising trout in our commons area as a collaboration with Trout in the Classrooms. We will be releasing the fish in the spring at a local stream.

Our apologies for not making tonight's board meeting. We will be attending the COW meeting next week to talk about Integration Specialists and the need for them in Duluth Public Schools.
