

Site Report – Pilot Point – October, 2021

To: Superintendent Kasie Luke and LPSS School Board Members	From: Michele Hughes, Head Teacher, Elementary Generalist
Outstanding Activities and Events	
<p>September-October got off to a great start here at Pilot Point School. Marina McGourty, the elementary teacher candidate, has jumped right in with students and has been such an asset to our team. Mr.K's class went fishing the second week of school with the intent of using their new smoker they constructed last year. Their efforts were successful and the smoked salmon was delicious. They shared it with students and families. They also saved some for Mike Janacek, the teacher that helped them construct the smoker last year. The third week Mr. K's class got to work with Mike Janacek on the next step of the steam bath construction project that was started last spring. Mike, Mr. K, and students worked on the trailer the steam is being built on and the walls. They made good progress. Mr. Janacek will return in a few weeks to work with students to complete this project. Elementary students have been busy on a few projects of their own. Students have been tending to a small herb garden that was started during summer school. They have lettuce, mint, basil, one tomato plant, and two African violets. They harvested their basil and made basil pesto. It was fun to see them share their pesto at lunch with the other students. Elementary students have also enjoyed the activities that we are doing to go along with the Mystery Science lessons. We really appreciate the subscription to this site. NWEA growth testing was held September 7-10. Parent -Teacher conferences were held September 22.</p>	
Personnel	
This Pilot Point team has been working hard to get our school year off to a good start for our students.	
Standards Based System/Curriculum Progress	
<p>Each student is making good progress in their levels. Elementary students have positive comments related to the new Everyday Math series. They like playing the math games that we are learning with the lessons. These games are also incorporated into their math stations for extra practice.</p>	
Technology Progress	
All students have devices that are in good working order. Elementary students at all levels use technology in their stations every day.	
Facility Update	
The facility is in good condition	
LSAC Activity	
Our first LSAC meeting will be October 11.	
Volunteer Report	
none	
Professional Development	
We attended a zoom meeting with Ms. McCarley on MAP data and analysis.	
Pupil Attendance	
Attendance has been good and consistent. We are continuing to encourage students to be at school each day. All students have incentives in place to reward their efforts on having good attendance.	
Student and Staff Safety	

Students and staff are healthy. We have had no reported symptoms or cases of illness among students or staff.

Subsistence Calendar

Students and families took full advantage of the subsistence calendar for fishing, berry picking, and hunting.
