

KAUFMAN ISD - MAINTENANCE REPORT MAY 2026

The Kaufman ISD maintenance team has continued to work on improvement projects around the district. In addition to those projects, there were over 240 campus based work orders that were completed during the month of April.

Here are a few of the projects that the team has been working on this month:

This month, the maintenance crew fabricated and installed some steel panels at the field house. The panels were designed to replace the old glass block walls that had been up for years. They will be the location points for new custom wraps.

Three (3) brand new doors were built and installed in district buildings this month. Two of them were installed at the field house, and one at the high school culinary room.

The front window at the field house was also replaced. The wall of glass blocks was removed and a new storefront style glass was installed. It looks much better!

This month, the maintenance team took some time to visit with the kids over at Nash Elementary. The crew talked with the students about different jobs and showed them how to use some of the equipment. It was fun !

As usual, the crew is always ready to cook if needed. This pancake breakfast was made for the bus drivers as part of transportation week. Well done guys!
