 - a. Does not charge tuition for IBO

The above districts do not charge their out of district employee's tuition for their children.

If we were to not charge tuition for the IBO transfers, the above districts do and we recommend charging the incoming IBO transfers pay the fees for the tests, approximately \$650.

Because we charge our employees who live outside of the district tuition, we recommend we charge IBO transfers the same tuition and pay their test fees.

As we move to a chapter 41 district and do not charge tuition to students of our employees, IBO students could also be considered for inter-district transfer free of tuition.
