

Review and Discuss Plans for Health Science Classroom and Laboratory

Vaughn Construction, the College's job order contractor, submitted a proposal to renovate space for a health science classroom and laboratory for a total of \$39,704. This amount includes labor, material/equipment, subcontractors, and contingencies. It does not include any work associated to the existing hollow metal door, frame, and associated glazing. Assuming reasonable access, the contractor anticipates completing this project in one month. The source of funding would be the Education and General Fund.

Since this proposal is below the \$50,000 threshold for Board approval, no action is required. This agenda item will be presented as an informative report.
