

Consider Approval of Proposal to Purchase Hardware and  
Installation Services for Audio Reinforcement in the Health Science Education Center  
(HSEC) Classrooms

Staff requests approval of this proposal to purchase hardware and installation services for Audio Reinforcement in the classrooms of the Health Science Education Center (HSEC). All hardware and installation services will be acquired from vendor Datavox (TIPS Contract No. 230105) and the total cost of purchase is \$65,156.91.

The project encompasses Datavox adding a Vaddio Audio Visual (AV) Bridge to all classrooms so that the already installed microphone systems can be heard within the rooms as well as remote during distance learning engagements or other similarly fashioned meetings. The said microphone systems will be relocated from their hard-to-access locations such as ceilings and behind large interactive display units, to the lecterns outfitted to mount the equipment securely and for easier access.

The source of the funding is the Construction Fund, and the project includes a 5-year extended warranty. A breakdown of the cost follows:

<b>Vendor/Quotes</b>	<b>Item/Quotes</b>	<b>Funding Sources</b>	<b>Cost</b>
Datavox (Contract: TIPS 230105)	Quote DVXA-15458 – Audio Reinforcement for Classrooms	Construction Fund	\$65,156.91
Total:			\$65,156.91
